

Stitch Snippet, 2024
Harvest Hues
Embroidery Designs

The leaves should print at approximately 5" high. Choose "no scaling," "100%," or "actual size" in your printer dialogue box, to ensure that your design prints at the actual size. If you choose "make it fit" or similar, your designs may end up printing smaller or larger than intended for this project.

The designs are provided here in mirror images. If you are making a pennant banner with three embroidered leaves, it is helpful to have one leaf pointing in a different direction. If you plan to make more than three embroidered leaves, vary the layout so that you have a good balance of leaves pointing in different directions.
