

Twinkle, Twinkle

a Christmas Star Ornament

Design to Transfer

The design will print at approximately 3.9" (using the dotted outer line as the perimeter). The design itself, minus the dotted lines, is just a bit less than 3.875" (3 7/8"). That's ideally what you're shooting for, size-wise. If you are making your own board, you can cut a 3 7/8" board. You want the design (minus the dotted outer perimeter line) to fit just inside the edge of the board all around.

You can cut a 4" diameter board, if you want. This is up to you. If you cut a 4" diameter board, the design will have more white space around the outer edge of the design, on the board.
